

Medicine/Science

This section is comprised of records and documents connected to Jewish individuals in the medical or scientific profession.

Most are found at the University of Edinburgh Centre for Research Collections, however some of the relevant material can be found in the archival holding of the Polish School of Medicine (PSM). Founded in 1941, the Polish School of Medicine was an unique academic initiative for students and doctors in the Polish armed forces to complete their studies during the Nazi occupation of Poland, which upon its opening also included civilian students. The students who matriculated numbered 336, of which approximately 12% were of Jewish descent, including many of their most prominent graduates and lecturers such as sculptor Professor Jakub Rostowski (1884-1971) and psychoanalyst Hanna Segal (1918-2011). The following table demonstrates the records which are connected to Jewish individuals who attended the School. Artefacts and records for the Polish School of Medicine can be found both in the collection at The Chancellor's Building, Little France, and student records are found at the Centre for Research Collections (CRC) at the University of Edinburgh.

Repository	Date	Title	Relevance	Scope	Reference
